

This, the thinnest, 2.5mm (.098") pitch connector, is 8.1mm (.319") in height after mounting and 3.8mm (.150") in width. It is designed to meet the demand for the high-density connection of internal wires to printed circuit boards. It is compact, highly reliable and low in cost.

Features

• Compact and slim

This connector is designed to be compact and unusually thin. It measures only 8.1mm (.319") high after mounting and is just 3.8mm (.150") wide.

• Highly reliable contact

The contact has long dimples near the center that ensure continuity of low voltage and low current circuits at all times, even under conditions of vibration and abusive prying.

• Polarizing guides

The header and housing have guides to prevent improper mating.

• Whisker prevention

The contact material is treated with a reflow process, and the square post is copper-undercoated and tin/lead-plated for whisker prevention.

• Easy and effective crimping

Although the contact is compact, it has a long wire strip length, $2.6 \pm 0.4\text{mm}$ (.102" \pm .016"). This long length is very useful for automatic crimping and when crimping shielded wires.

• Interchangeability

The shrouded header is interchangeable with those of 2.5mm (.098") pitch insulation displacement HR connectors.

Specifications

- Current rating: 3.0A AC, DC
 - Voltage rating: 250V AC, DC
 - Temperature range: -25°C to +85°C
(including temperature rise in applying electrical current)
 - Contact resistance: Initial value/10m Ω max.
After environmental testing/20m Ω max.
 - Insulation resistance: 1,000M Ω min.
 - Withstanding voltage: 800V AC/minute
 - Applicable wire: AWG #32 to #22
 - Applicable PC board thickness: 0.8 to 1.6mm (.031" to .063")
- * Contact JST for details.

Standards

 Recognized file No. E60389

 Certified file No. LR20812

 File No. R75089 (conforms to DIN/VDE 0627)

Material and Finish

Post: Brass, copper-undercoated, tin/lead plated
Wafer: Nylon 66, UL94V-0, natural (white)

Note:

1. Also available and identified as model BxxB-EH is a top entry type having a post extension length of 4.0mm(.157")
2. Top entry type headers are not TÜV approved.

PC board layout (viewed from soldering side) and Assembly layout

Note:

1. Tolerances are non-cumulative: $\pm 0.05\text{mm}(\pm .002")$ for all centers.
2. Hole dimension differ according to the kind of PC board and piercing method. If PC boards made of hard material such as FR-4 are used, the hole dimensions should be larger. The dimensions above should serve as a guideline. Contact JST for details.
